THE DIGITAL EVOLUTION

PARMA
2025/2027

The future of Orthodontics and Dentistry is significantly influenced by the advent of digital technology and the change in expectations of our patients.

A modern approach often requires Interdisciplinary know how, digital planning, predictable execution and a comprehensive team approach.

The orthodontic treatment should facilitate the Minimal invasiveness of the Restorative and Perio approach. These new “mini-invasive” techniques need a different clinical management of the patients. Composite and ceramic materials, can be used, not only to complete orthodontic cases, but also to manage and solve esthetic and functional problems.

Aligners have been initially accepted as a mean for a less visible dental alignment; they are significantly expanding their potential.

Which are the limits and the possibilities?

The future of mainstream orthodontics, periodontics and restorative dentistry will be based on core values that protect the best interests of our patients.

We can offer them options ranging from traditional orthodontics, perio ad restorative treatments to the most sophisticated Ortho facial dentistry.

Speakers

Dr. Renato Cocconi
Dr. Silvia Rapa
Dr. Nikolaos Perakis
Dr. Giorgio Cocconi
Dr. Luca Breveglieri
Dr. Renzo De Gabriele
Dr. Daniela Garbo
Dr. Marco Rosa
Dr. Claudio Mazzotti
Dr. Domingo Martin
Dr. Alberto Canabez
Dr. Guido Fichera
Dr. Roberto Perasso
Dr. Monica Imelio
Dr. Mirco Raffaini
Dr. Lorenzo Trevisiol
Dr. Elisabetta Grendene
Dr. Michael Gunson

Technicians

Odt. Gianluca Dallatana
Odt. Roberto Riva
Odt. Franco Pozzi
Odt. Ateicos Quintavalla

Session Dates

01 | June 20-21, 2025
02 | October 31
November 01, 2025
03 | January 16-17, 2026
04 | April 17-18, 2026
05 | June 26-27-28, 2026
06 | November 6-7-8, 2026
07 | February 12-13, 2027

Official language

English / Simultaneous translation

Session 1 | The Ortho-Restorative synergy

June 20-21, 2025

Renato Cocconi
Silvia Rapa
Nikolaos Perakis
Giorgio Cocconi
Luca Breveglieri

Ateicos Quintavalla
Franco Pozzi
Gianluca Dallatana
Roberto Riva

Digitally guided interdisciplinary treatment planning - pt. 1

FOCUS
Patient management across the transition from adolescence to young adulthood

- Missing laterals: to open or to close
- Oligodontia
- Traumatic loss of teeth in the aesthetic zone
- Orthodontic and restorative dentistry
- Adhesion: the revolution in dentistry
- Direct Composite restorations
- Injection moulding technique
- Cad Cam restorations
- Printed restorations
- Veneers
- Implants
- Digital treatment planning for aligners and fixed appliances
- Diagnostic set up and operative set up
- The digital connection: the orthodontist, the digital lab and the restorative dentist

In collaboration with PERAKIS EDUCATION | This session is held in conjunction with the Restorative for orthodontics - R40 Course.

Session 2 | A digital bone first approach with TADs

October 31 / November 01, 2025

Renato Cocconi
Renzo De Gabriele

Gianluca Dallatana
Roberto Riva

The Easy Driver® System: a digital bone first approach with TADs

FOCUS
TADs in contemporary orthodontic

- MARPE & surgically assisted Marpe
- Different appliances design with the BENEfit® System
- Distalizing appliances - Mesializing appliances - Bone borne palatal expander
- TADs and aligners
- Class 3 borderline treatment with TADs

Discover all the courses scheduled on continuing-education.it

Session 3 | Digital planning and Biomechanical/Ortho-Perio

January 16-17, 2026

Renato Cocconi
Silvia Rapa

Digital planning and Biomechanical staging fixed appliance and aligners

FOCUS | Part 1
Class 2 treatment with aligner and fixed appliance Ortho-Perio patients

- Class 2 treatment
- Rationale for distalization with fixed appliances & TADs
- Different TADs supported appliances
- The X5: Extractions in Class 2 treatment
- Vertical control mechanics with TADs

Daniela Garbo
Marco Rosa
Claudio Mazzotti

Ortho-Perio patients

- The Ortho–Perio Patient (4th Stadium)
- Ortho–Perio an essential cooperation
- Classification of Periodontal Disease and international guidelines - preorthodontic guidelines
- Management of deep probing depths, vertical lesions and timing of Periodontal intervention
- Healing time before orthodontic movement

Session 4 | Digital planning and Biomechanical

April 17-18, 2026

Renato Cocconi
Silvia Rapa

Digital planning and Biomechanical staging fixed appliance and aligners

FOCUS | Part 2
Class 2 treatment with aligner and fixed appliance

- Class 2 treatment
- Rationale for distalization with fixed appliances & TADs
- Different TADs supported appliances
- The X5: Extractions in Class 2 treatment
- Vertical control mechanics with TADs

Domingo Martin
Alberto Canabez

Orthodontics and Rejuvenation a New Paradigm in Orthodontics

Discover all the courses scheduled on continuing-education.it

Session 5 | The Ortho - Restorative Sinergy

June 26-27-28, 2026

Renato Cocconi
Nikolaos Perakis
Claudio Mazzotti
Guido Fichera
Roberto Perasso
Monica Imelio

Digital driven interdisciplinary treatment - pt. 2

FOCUS
Ortho-Perio-Restorative treatments
Interdisciplinary protocols for a new standardized approach

- Adult patient with compromised dentition and pathological migration associated with perio
- The hardest challenge for the orthodontist - Secondary malocclusion
- Role of orthodontics in occlusal design and restoration
- Synergy between prosthodontics treatment and orthodontic movement interdisciplinary case
- Classification of Periodontal Disease and International Guidelines - Pre-Orthodontic Guidelines
- Management of deep probing depths, Vertical lesions, and Timing of periodontal intervention
- Healing times before orthodontic movement
- Periodontal treatments in the esthetic zone: Orthodontics, Restorative dentistry & Mucogengival surgery: timing of intervention
- Interdisciplinary possibilities and protocols: a new standardized rational approach.

In collaboration with PERAKIS EDUCATION | This session is held in conjunction with the Restorative for orthodontics - R40 Course.

Session 6 | Surgical Session

November 13-14-15, 2026

Mirco Raffaini
Renato Cocconi
Lorenzo Trevisol
Elisabetta Grendene

From Orthognatic to Ortho-Facial Surgery

FOCUS
Ortho surgery treatment

- Treatment of Pre/Post surgical cases
- Planning of surgical cases
- Digital treatment protocols
- Bimaxillary ortho surgery of Class 2 and Class 3 cases
- Surgical treatment of open bites
- Post surgical refinement
- Key point for successful virtual planning in orthognatic surgical

Michael Gunson
LIVE STREAMING

TMJ --> Orthognatic Surgery “weak link”

Discover all the courses scheduled on continuing-education.it

Session 7 | Review of the course

February 12-13, 2027

Renato Cocconi

Summary of the topics & protocols presented

FOCUS
Presentation of cases

- Biomechanical protocols with fixed appliances and aligners
- Biomechanical protocols
- TADs Protocols
- Ortho-Surgery Protocols

During each meeting, any form of video recording and/or photography is prohibited unless authorized by the organization.

The schedule may be subject to changes in dates and/or times, which will be promptly communicated to participants.
